1 Image-based skin color and texture analysis/synthesis by extracting hemoglobin and melanin information in the skin

Norimichi Tsumura, Nobutoshi Ojima, Kayoko Sato, Mitsuhiro Shiraishi, Hideto Shimizu, Hirohide Nabeshima, Syuuichi Akazaki, Kimihiko Hori, Yoichi Miyake

July 2003 **ACM Transactions on Graphics (TOG)**, Volume 22 Issue 3

Full text available: pdf(2.81 MB) Additional Information: full citation, abstract, references, index terms

This paper proposes an E-cosmetic function for digital images based on physics and physiologically-based image processing. A practical skin color and texture analysis/synthesis technique is introduced for this E-cosmetic function. Shading on the face is removed by a simple color vector analysis in the optical density domain as an inverse lighting technique. The image without shading is analyzed by a previously introduced technique that extracts hemoglobin and melanin components by independent co ...

Keywords: hemoglobin, independent component analysis, inverse lighting, melanin, physiologically-based rendering, pyramid-based texture analysis and synthesis, skin color, skin texture

2 A structural view of the Cedar programming environment

Daniel C. Swinehart, Polle T. Zellweger, Richard J. Beach, Robert B. Hagmann

August 1986 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 8 Issue 4

Full text available: pdf(6.32 MB) Additional Information: full citation, abstract, references, citings, index terms

This paper presents an overview of the Cedar programming environment, focusing on its overall structure—that is, the major components of Cedar and the way they are organized. Cedar supports the development of programs written in a single programming language, also called Cedar. Its primary purpose is to increase the productivity of programmers whose activities include experimental programming and the development of prototype software systems for a high-performance personal computer. T ...

3 Applying Tufte's principles of information design to creating effective Web sites

Beverly B. Zimmermann

October 1997 **Proceedings of the 15th annual international conference on Computer documentation**

Full text available: pdf(926.69 KB) Additional Information: full citation, references, index terms

Keywords: document design, home pages, informationdesign, web page design

4 Similarity querying II: QCluster: relevance feedback using adaptive clustering for content-based image retrieval

Deok-Hwan Kim, Chin-Wan Chung

June 2003 **Proceedings of the 2003 ACM SIGMOD international conference on Management of data**

Full text available: pdf(2.15 MB) Additional Information: full citation, abstract, references, citings, index terms

The learning-enhanced relevance feedback has been one of the most active research areas in content-based image retrieval in recent years. However, few methods using the relevance feedback are currently available to process relatively complex queries on large image databases. In the case of complex image queries, the feature space and the distance function of the user's perception are usually different from those of the system. This difference leads to the representation of a query with multiple ...

Keywords: classification, cluster-merging, content-based image retrieval, image database, relevance feedback

5 The design and analysis of a cache architecture for texture mapping

Ziyad S. Hakura, Anoop Gupta

May 1997 **ACM SIGARCH Computer Architecture News , Proceedings of the 24th annual international symposium on Computer architecture**, Volume 25 Issue 2

Full text available: pdf(2.10 MB) Additional Information: full citation, abstract, references, citings, index terms

The effectiveness of texture mapping in enhancing the realism of computer generated imagery has made support for real-time texture mapping a critical part of graphics pipelines. Despite a recent surge in interest in three-dimensional graphics from computer architects, high-quality high-speed texture mapping has so far been confined to costly hardware systems that use brute-force techniques to achieve high performance. One obstacle faced by designers of texture mapping systems is the requirement ...

6 Human communications issues in advanced UIs

Aaron Marcus

April 1993 **Communications of the ACM**, Volume 36 Issue 4

Full text available: pdf(4.83 MB) Additional Information: full citation, references, citings, index terms

7 Session P15: multidimensional, motion, and information visualization: Assisted navigation for large information spaces

Brent M. Dennis, Christopher G. Healey

October 2002 **Proceedings of the conference on Visualization '02**

Full text available: pdf(4.36 MB) Additional Information: full citation, abstract, references, citings, index terms

This paper presents a new technique for visualizing large, complex collections of data. The *size* and *dimensionality* of these datasets make them challenging to display in an effective manner. The images must show the global structure of spatial relationships within the dataset, yet at the same time accurately represent the local detail of each data element being visualized. We propose combining ideas from information and scientific visualization

together with a *navigation assista ...*

8 Language representation and psychology: The relation of grammar to cognition: a synopsis
Leonard Talmy
July 1978 **Proceedings of the 1978 workshop on Theoretical issues in natural language processing**
Full text available: pdf(1.20 MB) Additional Information: full citation, abstract, references, citings
Publisher Site

A sentence (or other portion of discourse) is taken to evoke in the listener a meaning complex, here called a "cognitive representation". The lexical elements of the sentence, to simplify, by and large specify the content of the cognitive representation, while the grammatical elements specify its structure. Thus, looking systematically at the actual notions specified by grammatical elements can give us a handle for ascertaining the very makeup of (linguistic-) cognitive structuring. We according ...

9 The relation of grammar to cognition—a synopsis
Leonard Talmy
July 1978 **Proceedings of the theoretical issues in natural language processing-2**
Full text available: pdf(1.18 MB) Additional Information: full citation, abstract, references, citings, index terms

A sentence (or other portion of discourse) is taken to evoke in the listener a meaning complex, here called a "cognitive representation". The lexical elements of the sentence, to simplify, by and large specify the content of the cognitive representation, while the grammatical elements specify its structure. Thus, looking systematically at the actual notions specified by grammatical elements can give us a handle for ascertaining the very makeup of (linguistic-) cognitive structur ...
